Pediatric Airway Assessment

This screening form may help identify patients at increased risk for sleep-related breathing disorders (e.g., obstructive sleep apnea) and/or breathing complications when undergoing sedation or general anesthesia. Such patients may benefit from referral to a medical professional for further evaluation and management.

Patient name:					Birthdat	e:		/	_/		Ger	nder:
Part I. General history												
Was your child born prematurely?		NO		YES	(how man	ıy w	eeks e	early?):				
Does your child have a craniofacial syndrome?		NO		YES	(describe)	:						
Does your child have any history of:												
a physical or neurological impairment?		NO										
low muscle tone?		NO
